Moheed Ul Hassan

FinTech Professional

Rawalpindi, Pakistan | +92 312 9700356 | hassanmoheed86@gmail.com | LinkedIn

Professional Summary

Financial Technology graduate combining a strong foundation in financial analysis with practical, Python-based technical skills and coursework in digital banking and payments. Experienced in portfolio optimization, risk-return analysis, firm valuation, and financial reporting through both academic projects and internships in finance and strategic communication. Proficient in Python, Power BI, Excel, and machine learning-based approaches to financial modeling, with a track record of applying analytical techniques to real-world portfolio, forecasting, and digital banking problems. Dean's List honoree who maintained a strong academic record while leading media operations for a university society. Eager to bring an analytical, technically grounded skill set to a progressive fintech, digital banking, or financial-analysis role.

Education

FAST – National University of Computer & Emerging Sciences — **Islamabad, Pakistan**
Bachelor's in Financial Technology — *2022 – 2026*

Saint Mary's Academy — **Rawalpindi, Pakistan**
Intermediate (Pre-Engineering) — *2019*

Saint Mary's Academy — **Rawalpindi, Pakistan**
Matric — *2017*

Professional Experience

Finance Intern — **2024**
IMARAT Group Pakistan

- Assisted in financial reporting, budgeting, and cost analysis to support accurate and timely internal reporting cycles
- Compiled and reviewed financial statements and supporting schedules, helping maintain data accuracy across reporting periods
- Assisted in preparing budgets and tracking cost variances against forecasts to support departmental planning
- Conducted cost analysis to identify potential efficiencies and support expense-optimization decisions
- Supported firm valuation exercises using financial modeling and valuation techniques, contributing to investment-related decision-making
- Provided financial analysis and insights that informed internal management and decision-making processes

Intern — **2023**
Inter-Services Public Relations (ISPR) Pakistan

- Worked on strategic communication initiatives, supporting the development and coordination of organizational messaging
- Conducted media analysis to track coverage trends and inform communication planning
- Supported digital media handling, including content organization and platform-level coordination
- Assisted with data management tasks, ensuring information was accurately organized and readily accessible

Projects

Final Year Project – AI-Enhanced Cryptocurrency Portfolio Optimization | Python, AI/ML Models

- Designed and built a cryptocurrency portfolio optimization tool that integrates traditional financial theory with AI-based optimization techniques
- Sourced and processed real-time and historical market data via the CoinGecko and Yahoo Finance APIs, using yfinance's batch-download approach to streamline large-scale data collection
- Applied risk-return optimization and diversification techniques to construct efficient digital-currency portfolios
- Benchmarked classical portfolio theory (e.g., Markowitz Modern Portfolio Theory) against machine learning-based optimization approaches to evaluate performance differences
- Analyzed portfolio performance across varying risk profiles to assess the robustness and practical viability of each approach
- Documented research methodology and findings using APA 7th Edition-formatted academic references

PayBuddy – FinTech Cybersecurity App | Python, Streamlit

- Developed a secure FinTech payment application with authentication and transaction validation
- Implemented security controls for financial data protection

Event-Driven Stock Price Forecasting Using Machine Learning

- Developed an XGBoost machine learning pipeline to forecast stock returns by incorporating major sporting events and company sponsorships

- Improved prediction accuracy during high-impact dates

Portfolio Analysis & Optimization using Excel, Power BI & Solver
- Optimized a 6-security portfolio using Excel Solver and Modern Portfolio Theory to achieve 20.7% improvement in risk-adjusted returns
- Visualized performance through an interactive Power BI dashboard

Outlet Management System with Blockchain | Solidity, Ethereum
- Built a blockchain-based system for transparent and tamper-proof transactions

Financial Reports & Analysis Project
- Conducted financial statement and annual report analysis
- Performed ratio, risk, and investment evaluation

Achievements & Extracurriculars

Dean's List of Honour **FAST NUCES**
Achieved a Semester GPA of 3.93 (8th Semester) for academic excellence

Dean's List of Honour **FAST NUCES**
Achieved a Semester GPA of 3.80 (7th Semester) for academic excellence

Head of Media & Coverage **Fast Management Society (FMS)**
Managed media operations, event coverage, and strategic communication

Trainings & Certifications

Generative AI Engineering **2024**
PIAC Pakistan
- Focused on developing scalable AI applications using Generative AI technologies, including LLMs and Custom GPTs with Python

Digital Banking & Payment Industry **FAST NUCES**
University Coursework (FT4005)
- Studied digital banking operations, payment systems, and regulatory frameworks within the financial services industry

Skills & Tools

Accounting & Finance Skills
- ◆ Investment & Portfolio Optimization
- ◆ Firm Valuation
- ◆ Financial Reports Analysis
- ◆ Cost Analysis
- ◆ Risk Analysis
- ◆ DDM & Multiples-Based Valuation
- ◆ Financial Reporting & Budgeting
- ◆ Decision Making

Technical & Programming Skills
- ◆ Python (incl. Python for Finance)
- ◆ MySQL, MongoDB
- ◆ LLMs & RAG Architecture
- ◆ Kali Linux
- ◆ C/C++
- ◆ Machine Learning
- ◆ FastAPI & MLOps
- ◆ FinTech Security Fundamentals

Analytics & Professional Skills
- ◆ Power BI
- ◆ E-Views & SPSS
- ◆ Strategic Communication
- ◆ MS Excel & Data Mining
- ◆ Data Analysis & Management
- ◆ Management & Organization
